ArenaMind AI Design System

Version: 1.0

Status: Draft

Design Language: Arena Design System (ADS)

Overview

Arena Design System (ADS) is the unified visual language powering every digital experience within ArenaMind AI.

It provides a scalable foundation for designing consistent, accessible, responsive, and AI-first interfaces across:

- AI Command Center
 - Digital Twin
 - Fan Assistant
 - Executive Dashboard
 - Emergency Center
 - Volunteer Portal
 - Mobile Experience
 - Accessibility Mode
-

Design Philosophy

ArenaMind AI combines five design philosophies into one cohesive experience.

Philosophy	Contribution
Apple Human Interface	Simplicity
Material 3	Accessibility
Tesla OS	Operational Dashboard
FIFA Broadcast Graphics	Sports Identity
Apple Vision Pro	Spatial Computing

Core Principles

1. AI First

The interface should never feel like traditional enterprise software.

Artificial intelligence is the primary interaction model. Instead of navigating through menus, users ask:

```
Predict crowd congestion.  
Generate evacuation plan.  
Summarize operational issues.  
Optimize transportation.
```

AI becomes the operating system.

2. Information Hierarchy

Every page should answer three questions within five seconds:

```
What is happening?  
Why is it happening?  
What should I do next?
```

Everything else is secondary.

3. Progressive Disclosure

Never overwhelm users. Show information progressively:

Important

Useful

Advanced

4. Motion Communicates Intelligence

Motion exists to explain—never to decorate.

Every animation should communicate:

- hierarchy
 - transition
 - system state
 - AI reasoning
 - navigation
-

5. Accessibility First

Every interaction must work with:

- keyboard
- touch
- voice
- assistive technologies

without compromise.

Visual Language

ArenaMind AI is inspired by:

Night Stadiums

Token	Size
Display XL	72px
Display L	56px
Display M	48px
H1	40px
H2	32px
H3	28px
H4	24px
H5	20px
H6	18px
Body L	18px
Body M	16px
Body S	14px
Caption	12px

Spacing System

Based on an 8-point grid.

4
8
16
24
32
40
48
56
64
80
96
120

Never use arbitrary spacing.

Border Radius

Component	Radius
Button	12px
Card	20px
Modal	24px
Dialog	24px
Input	14px
AI Bubble	20px

Shadows

Cards should appear floating.

Design Quality Checklist

Every screen must satisfy:

- AI-first interaction
- Glassmorphism consistency

- 8-point spacing
 - Accessible colors
 - Responsive layout
 - Smooth motion
 - Premium typography
 - Consistent iconography
 - Minimal cognitive load
 - Clear information hierarchy
-
