Landing Page

ArenaMind AI UI/UX Specification

Screen ID: LP-001

Version: 1.0

Status: Draft

Overview

The Landing Page serves as the first interaction users have with ArenaMind AI.

Unlike traditional landing pages, ArenaMind AI introduces users to an immersive AI-powered operating system through a cinematic, interactive, and storytelling-driven experience.

The page should communicate three key ideas within the first **5 seconds**:

- ArenaMind AI is powered by Generative AI.
- It orchestrates the FIFA World Cup stadium ecosystem.
- It is immersive, intelligent, and futuristic.

The page should feel closer to a product launch experience than a corporate website.

Design Goals

The Landing Page should inspire:

- Wonder
- Trust

- Innovation
- Intelligence
- Premium Quality

Users should immediately think:

| "This looks like the operating system behind the FIFA World Cup."

User Goals

Primary Users

- Hackathon Judges
- Organizers
- Investors
- Developers
- Football Fans

Goals

- Understand ArenaMind AI
 - Experience the platform
 - Explore AI capabilities
 - Navigate to the live prototype
-

Hero Background

The hero background is a live 3D environment.

Includes

- FIFA-inspired Stadium
 - Stadium Lights
 - Fog
 - Crowd Particles
 - Drone Lights
 - Dynamic Sky
 - AI Neural Network
 - Floating Holograms
-

Hero Animations

Camera slowly orbits stadium.

Crowd particles move.

AI nodes pulse.

Lighting changes subtly.

CTA buttons glow on hover.

Headline reveals line-by-line.

Floating AI Widgets

Widgets orbit the stadium.

Examples

Crowd Density

82%

Background

Animated neural network.

Component Usage

Component	Usage
Floating Navigation	Persistent navigation
Hero Buttons	Primary actions
Glass Cards	Module previews
AI Insight Card	AI explanations
Metric Cards	Live operational data
Digital Twin Viewer	Interactive stadium
Particle Background	Ambient motion

Motion Specifications

Entrance
Fade + Slide + Blur
Hover
Lift + Glow
Click
Scale + Ripple
Scroll
Parallax + Camera Movement
Transitions
Physics-based
Duration
250–600ms

Accessibility

Supports

- Keyboard navigation
 - Screen readers
 - Reduced motion
 - High contrast
 - Voice navigation
 - Focus indicators
 - WCAG 2.2 AA
-

Responsive Layout

Desktop (1440px+)

Two-column hero
Full 3D stadium
Interactive widgets

Tablet

Single-column
Reduced stadium complexity
Compact navigation

Mobile

Hero image simplified
Static Digital Twin preview
Bottom navigation
Floating AI button

Empty States

If live data unavailable
Display

Demo Simulation Mode
Using sample FIFA World Cup data.

Loading Experience

Instead of a spinner
Show

- Stadium wireframe

- AI pulse
 - Loading progress
 - Animated neural network
-

Error States

If AI unavailable

```
AI services are temporarily unavailable.  
  
Switching to fallback model...
```

Automatically route requests

Gemini → Groq

without interrupting the user.

Performance Targets

Metric	Target
First Contentful Paint	<2.5s
Largest Contentful Paint	<3s
Time to Interactive	<4s
Lighthouse Performance	90+
Lighthouse Accessibility	100
Lighthouse Best Practices	100

Assets Required

3D

- Stadium Model (.glb)

- Drone Models
- Crowd Particles
- Holographic Panels
- Earth Globe

Images

- FIFA-inspired backgrounds
- Stadium lighting
- AI icons

Icons

- Lucide React
-

Developer Notes

Frontend

- Next.js App Router
- React 19
- Tailwind CSS
- Framer Motion
- GSAP
- React Three Fiber
- Drei

State

- Zustand

Maps

- Google Maps Platform

AI

- Gemini API (Primary)
- Groq API (Fallback)

Deployment

- Vercel
-

Acceptance Criteria

- Hero loads with cinematic animation.
 - Navigation remains sticky and responsive.
 - 3D stadium is interactive.
 - AI widgets display live/demo data.
 - Scroll transitions are smooth.
 - CTA buttons navigate correctly.
 - Layout adapts across desktop, tablet, and mobile.
 - Accessibility meets WCAG 2.2 AA.
 - Performance meets Lighthouse targets.
-

Future Enhancements

- Live World Cup match overlays
- Personalized fan landing experience
- Voice-controlled navigation
- Apple Vision Pro immersive mode
- Multi-language landing page
- Dynamic match-day themes
- AR stadium preview

- Real-time global tournament map
-

<div align="center">

Landing Experience Philosophy

"The landing page should not feel like entering a website. It should feel like entering the FIFA World Cup Control Room."

ArenaMind AI is introduced through cinematic storytelling, immersive 3D, and AI-first interactions that immediately establish it as the intelligence layer powering the world's biggest sporting event.

</div>
